

Aids in Africa

Help us Help them

Aids Is one of the biggest problems in Africa

- 88% of all people in Africa are living with HIV
- 92% of all Aids deaths in 2007 were in Africa
- By 2025, there may be as many as 90 million cases of HIV/Aids in Africa, and a catastrophic death toll that would cause a collapse of African Economies.

What You Can Do to Help

- If you join us, with every bottle of HIV fighting medicine sold, one will go to a Village in Africa
- If you can't join us, even small donations can help our cause.

Join Us

- Together we can stop HIV in Africa
